PETER HAUSKEN
SOFTWARE ENGINEER

Experience

ScriptEd
Instructor

New York, NY
Oct 2017 to Current

- Taught students from underresourced high schools web design, including HTML, CSS, jQuery, and JavaScript, helping them attain scholarships and pass technical assessments
- Helped manage and organize curriculum, customizing lesson plans while coordinating instruction with teammates to individualize learning

Foothold Technology
Office Manager

New York
Aug 2016 to May 2017

- Managed company logistics, day-to-day operations, shipping, and supply management, while interfacing with both local and remote teams
- Provided sales and marketing teams with actionable data scraped from variety of sources, including CMR and web

Sogeti
Office Administrator

New York, NY
Oct 2015 to Aug 2016

- Oversaw $2M of monthly invoicing at distributed technology consulting form, while simultaneously handling billing reconciliation, employee time and expenses, and AR tracking
- Worked with Oracle system to handle HR issues, coordinate with accounting team, and provide management with up-to-date reporting

ShredAbility
Office Manager

Bronx, NY
Oct 2014 to Oct 2015

- Implemented and managed operational, customer service, accounting, and organizational processes for non-profit startup, helping bring quarterly revenue to all-time high
- Created database system to handle tracking and reporting, helping reduce human error and inefficiency

Projects

The Five Spotify (Rails, React, Redux)
- Single page web app inspired by Spotify (Github)
- Utilizes DRY components with conditional rendering, to create dynamic UX for playlist/song CRUD
- Implements RESTful Rails JSON API, using polymorphic associations, to update in real-time
- Integrates HTML5 audio tag, AWS to create custom audio player

Tetris (JavaScript, HTML5)
- Browser based implementation of arcade classic (Github)
- Employs class components that independently manage object collisions and rendering
- Utilizes ES6/7 and HTML Canvas for all game mechanics, foregoing external libraries or frameworks

ORMery (Ruby)
- Ruby based ORM inspired by ActiveRecord
- Applies Ruby metaprogramming to dynamically create associations
- Leverages SQL queries to model built-in associations and search
